

Inorganic and Analytical Chemistry Seminar Program, Seminar 2, 2008

Coordinator: Professor Tony Wedd

Email: agw@unimelb.edu.au

12 noon Tuesdays, Cuming Theatre, School of Chemistry

Date	Speaker	Title
July 29	Dr. Chris Ritchie (University of Melbourne)	Self-Assembly of Polyoxometalates Anions: From Molecules to Framework Materials
Aug 5	Dr. George Khairallah (University of Melbourne)	Aspects of Mass Spectrometry: Metal Ions and Biomolecules
Aug 12	Dr. Stuart Batten (Monash University)	Scorpions, Crowns and Nanoballs
Aug 19	Prof. Richard Keene (James Cook University)	Metal Complexes as Structure-Selective Binding Agents for Nucleic Acids
Aug 26	Andreas Stasch (Monash University)	The Chemistry of Molecular Magnesium(II) Compounds
Sept 2	Assoc. Prof. Spas Kolev (University of Melbourne)	Sensitive Gas-Diffusion Sequential Injection Analysis Based on Smart Flow Manipulation
Sept 9	Dr. Tae-Hyuk Kwon (University of Melbourne)	Fascinating Phosphorescent Sensors based on Iridium Complexes
Sept 16	Ms. Karrera Djoko (University of Melbourne)	How to Control Seven Copper Atoms in a Single Enzyme Reaction
Sept 23	Prof. Michael Hall (Texas A&M University)	Carbon-Hydrogen Bond Activation
Oct 7	Mr. Yanyan Mulyana (University of Melbourne)	An Investigation of Redox-Active Ligands in Polynuclear Metal Complexes
Oct 14	Mr. Patrick Mornane (University of Melbourne)	Extraction and Facilitated Transport of Mercury using Polymer Inclusion Membranes
